Subject Index

0100 Costs

0103 Cost Estimating

Joint Lot Sizing and Inspection Policy in an EOQ Model with Random Yield; Zhang, Xin and Yigal Gerchak; March; p. 41.

Aggregate Backorder Exchange Curves; Aucamp, Donald C.; September; p. 281.

0300 Engineering Economics

0302 Equipment Replacement

Machine Maintenance with Multiple Maintenance Actions; Hopp, Wallace J. and Sung-Chi Wu; September; p. 226.

0303 Investment Analysis

Optimal Depreciation Policy Under the Tax Reform Act of 1986; Fleischer, G. A., A. K. Mason and L. C. Leung; December; p. 330.

0600 Human Engineering

0603 Ergonomics

Applying Production Standards and Feedback to Improve Worker Productivity and Satisfaction in a Repetitive Production Task; Das, Biman and Ashraf A. Shikdar; June; p. 124.

Human Physiological Capabilities for Prolonged Manual Lifting Tasks; Genaidy, A. M., T. M. Khalil, S. S. Asfour and R. C. Duncan; September; p. 270.

0605 Motivation

Applying Production Standards and Feedback to Improve Worker Productivity and Satisfaction in a Repetitive Production Task; Das, Biman and Ashraf A. Shikdar; June; p. 124.

0608 Safety and Health

Human Physiological Capabilities for Prolonged Manual Lifting Tasks; Genaidy, A. M., T. M. Khalil, S. S. Asfour and R. C. Duncan; September; p. 270.

0900 Industries

0903 Health Care

Models for Determining Estimated Start Times and Case Orderings in Hospital Operating Rooms; Weiss, Elliott N.; June; p. 143.

1000 Management

1003 Decision Making

The Choice of Manufacturing Technology in the Presence of Dynamic Demand and Experience Effects; Amit, Raphael and Yael Ilan; June; p. 100.

1100 Material Handling

1102 Conveyors

Closed-Loop Conveyor Systems with Breakdown and Repair of Unloading Stations; Bastani, Ali S.; December; p. 351.

1105 Dispatching, Scheduling

Allocating Items to an Automated Storage and Retrieval System; Hackman, Steven T. and Meir J. Rosenblatt; March; p. 7.

1110 Receiving, Shipping

Geometric Approaches to Solve the Chebyshev Traveling Salesman Problem; Bozer, Yavuz A., Ellen C. Schorn and Gunter P. Sharp; September; p. 238.

1111 Storage, Warehousing

Allocating Items to an Automated Storage and Retriev al System; Hackman, Steven T. and Meir J. Rosenblatt; March; p. 7.

Geometric Approaches to Solve the Chebyshev Traveling Salesman Problem; Bozer, Yavuz A., Ellen C. Schorn and Gunter P. Sharp; September; p. 238.

Dynamic Operational Policies in an Automated Warehouse; Jaikumar, Ramchandran and Marius M. Solomon; December; p. 370.

1200 Methods Engineering

1201 Automation, Mechanization

A Study of an Automatic Transfer Line System with a Sub-Line; Iyama, Toshirou and Takeshi Odawara; September; p. 204.

Dynamic Operational Policies in an Automated Warehouse; Jaikumar, Ramchandran and Marius M. Solomon; December; p. 370.

1205 Manufacturing Engineering

Monotonicity in Optimal Policy of a Flexible Manufacturing Cell Feeding Several Production Lines; Shioyama, Tadayoshi, Katsuhisa Ohno and Hiroshi Kise; March; p. 2.

Flexible Parts Routing in Manufacturing Systems; Yao, David D. and Frances F. Pei; March; p. 48.

Optimal Selection of Workholding Devices for Rotational Parts; Bidanda, Bopaya and Jayant Rajgopal; March; p. 65.

Designing a Cellular Manufacturing System: A Materials Flow Approach Based on Operation Sequences; Vakharia, Asoo J. and Urban Wemmerlöv; March; p. 84.

Taking Into Account Delays in Buffers for Analytical Performance Evaluation of Transfer Lines; Commault, Christian and Alain Sémery; June; p. 133.

Optimal Selection of Machinable Volumes; Kusiak, Andrew; June; p. 151.

A Study of an Automatic Transfer Line System with a Sub-Line; Iyama, Toshirou and Takeshi Odawara; September; p. 204.

Production Scheduling During Phased Implementation of Flexible Manufacturing Cells; Chakravarty, Amiya K. and Avraham Shtub; December; p. 292.

Production Rate of Transfer Lines Without Buffer Storage; Commault, C. and Y. Dallery; December; p. 315.

1209 Process Design

Optimal Selection of Machinable Volumes; Kusiak, Andrew; June; p. 151.

1300 Quantitative Methods

1301 Mathematical Models

Monotonicity in Optimal Policy of a Flexible Manufacturing Cell Feeding Several Production Lines; Shioyama, Tadayoshi, Katsuhisa Ohno and Hiroshi Kise; March; p. 2.

Allocating Items to an Automated Storage and Retrieval System; Hackman, Steven T. and Meir J. Rosenblatt; March; p. 7.

Resource-Constrained Scheduling of Projects with Variable-Intensity Activities; Leachman, Robert C., Abdurrezak Dincerler and Sooyoung Kim; March; p. 31.

Optimal Selection of Workholding Devices for Rotational Parts; Bidanda, Bopaya and Jayant Rajgopal; March; p. 65.

The Choice of Manufacturing Technology in the Presence of Dynamic Demand and Experience Effects; Amit, Raphael and Yael Ilan; June; p. 100.

Heuristic Procedures for Multi-Item Inventory Planning with Limited Storage; Dixon, Paul S. and Choon Lay Poh; June; p. 112.

Optimal Selection of Machinable Volumes; Kusiak, Andrew; June; p. 151.

Machine Maintenance with Multiple Maintenance Actions; Hopp, Wallace J. and Sung-Chi Wu; September; p. 226.

Scheduling Production of Common Components at a Single Facility; Aneja, Y. P. and N. Singh; September; p. 234.

Geometric Approaches to Solve the Chebyshev Traveling Salesman Problem; Bozer, Yavuz A., Ellen C. Schorn and Gunter P. Sharp; September; p. 238.

Optimal Depreciation Policy Under the Tax Reform Act of 1986; Fleischer, G. A., A. K. Mason and L. C. Leung; December; p. 330.

1302 Networks

A Primal Simplex Specialization for the Equal Flow Problem; Shetty, Bala; March; p. 24.

Estimating the Mean and Variance of PERT Activity Time Using Likelihood-Ratio of the Mode and the Midpoint; Chae, Kyung C. and Sehun Kim; September; p. 198.

1303 Programming: Linear, Nonlinear

A Hybrid Algorithm for Solving Polynomial Zero-One Mathematical Programming Problems; Snyder, Walter S. and James W. Chrissis; June; p. 161.

Using Pictorial Representations in Teaching Linear Programming Modeling; Evans, James R. and Jeffrey D. Camm; June; p. 191.

Production Scheduling During Phased Implementation of Flexible Manufacturing Cells; Chakravarty, Amiya K. and Avraham Shtub; December; p. 292.

The "More for Less" Paradox in Distribution Models: An Intuitive Explanation; Robb, David J.; December; p. 377.

1304 Regression Analysis

Analysis of the Prediction Problem with Errors in the Variables; Yum, Bong-Jin and Jai-Hyun Byun; March; p. 73.

1305 Simulation/Games

The Correlation Between Mean and Variance Estimators in Computer Simulation; Kang, Keebom and David Goldsman; March; p. 15.

Moments of Second Order Polynomials with Simulation Applications; Swain, James J. and David Goldsman; June; p. 168.

Variance Reduction in the Presence of Initial-Condition Bias; Nelson, Barry L.; December; p. 340.

1306 Applied Probability

The Correlation Between Mean and Variance Estimators in Computer Simulation; Kang, Keebom and David Goldsman; March; p. 15.

A Sequential Inspection Plan for Markov Dependent Production Processes; Bhat, U. Narayan, Ram Lal and Mahinda Karunaratne; March; p. 56.

Analysis of the Prediction Problem with Errors in the Variables; Yum, Bong-Jin and Jai-Hyun Byun; March; p. 73.

Moments of Second Order Polynomials with Simulation Applications; Swain, James J. and David Goldsman; June; p. 168.

Burn-In Models and Methods: A Review; Leemis, Lawrence M. and Margarita Beneke; June; p. 172.

Attribute Control Charts for Markov Dependent Production Processes; Bhat, U. Narayan and Ram Lal; June; p. 181.

Estimating the Mean and Variance of PERT Activity Time Using Likelihood-Ratio of the Mode and the Midpoint; Chae, Kyung C. and Sehun Kim; September; p. 198.

A Study of an Automatic Transfer Line System with a Sub-Line; Iyama, Toshirou and Takeshi Odawara; September; p. 204.

Machine Maintenance with Multiple Maintenance Actions; Hopp, Wallace J. and Sung-Chi Wu; September; p. 226.

Control Charts Applied as Filtering Devices Within a Feedback Control Loop; English, John R. and Kenneth E. Case; September; p. 255.

Production Rate of Transfer Lines Without Buffer Storage; Commault, C. and Y. Dallery; December; p. 315.

Variance Reduction in the Presence of Initial-Condition Bias; Nelson, Barry L.; December; p. 340.

Closed-Loop Conveyor Systems with Breakdown and Repair of Unloading Stations; Bastani, Ali S.; December; p. 351.

Adaptive Exponentially Weighted Moving Average Schemes Using a Kalman Filter; Hubele, Norma Faris and Shing I. Chang; December; p. 361.

1400 Production and Inventory Control

1403 Inventory Control

Joint Lot Sizing and Inspection Policy in an EOQ Model with Random Yield; Zhang, Xin and Yigal Gerchak; March; p. 41.

Heuristic Procedures for Multi-Item Inventory Planning with Limited Storage; Dixon, Paul S. and Choon Lay Poh; June; p. 112.

An Extension to the Class of Easy Economic Lot Scheduling Problems; Gallego, Guillermo; June; p. 189.
Aggregate Backorder Exchange Curves; Aucamp, Donald C.; September; p. 281.

1405 Production Control
Reacting to Scheduling Exceptions in FMS Environments; Dutta, Amitava; December; p. 300.

1406 Production Planning
Optimal Selection of Workholding Devices for Rotational Parts; Bidanda, Bopaya and Jayant Rajgopal; March; p. 65.
Designing a Cellular Manufacturing System: A Materials Flow Approach Based on Operation Sequences; Vakharia, Asoo J. and Urban Wemmerlöv; March; p. 84.
The Choice of Manufacturing Technology in the Presence of Dynamic Demand and Experience Effects; Amit, Raphael and Yael Ilan; June; p. 100.
Taking Into Account Delays in Buffers for Analytical Performance Evaluation of Transfer Lines; Commault, Christian and Alain Sémery; June; p. 133.
Production Rate of Transfer Lines Without Buffer Storage; Commault, C. and Y. Dallery; December; p. 315.

1407 Production Scheduling
Resource-Constrained Scheduling of Projects with Variable-Intensity Activities; Leachman, Robert C., Abdurrezak Dincerler and Sooyoung Kim; March; p. 31.
Flexible Parts Routing in Manufacturing Systems; Yao, David D. and Frances F. Pei; March; p. 48.
Models for Determining Estimated Start Times and Case Orderings in Hospital Operating Rooms; Weiss, Elliott N.; June; p. 143.
An Extension to the Class of Easy Economic Lot Scheduling Problems; Gallego, Guillermo; June; p. 189.
Heuristics for the Common Due Date Weighted Tardiness Problem; Fathi, Yahya and Henry W. L. Nuttle; September; p. 215.
Scheduling Production of Common Components at a Single Facility; Aneja, Y. P. and N. Singh; September; p. 234.
Minimizing the Weighted Sum of Late and Early Completion Penalties in a Single Machine; Ahmed, Mesbah U. and P. S. Sundararaghavan; September; p. 288.
Production Scheduling During Phased Implementation of Flexible Manufacturing Cells; Chakravarty, Amiya K. and Avraham Shtub; December; p. 292.

1500 Quality Control

1501 Inspection
Joint Lot Sizing and Inspection Policy in an EOQ Model with Random Yield; Zhang, Xin and Yigal Gerchak; March; p. 41.
A Sequential Inspection Plan for Markov Dependent Production Processes; Bhat, U. Narayan, Ram Lal and Mahinda Karunaratne; March; p. 56.

1502 Quality Control
Attribute Control Charts for Markov Dependent Production Processes; Bhat, U. Narayan and Ram Lal; June; p. 181.
Control Charts Applied as Filtering Devices Within a Feedback Control Loop; English, John R. and Kenneth E. Case; September; p. 255.
Adaptive Exponentially Weighted Moving Average Schemes Using a Kalman Filter; Hubele, Norma Faris and Shing I. Chang; December; p. 361.

1503 Reliability
Burn-In Models and Methods: A Review; Leemis, Lawrence M. and Margarita Beneke; June; p. 172.

1704 Information Retrieval
Geometric Approaches to Solve the Chebyshev Traveling Salesman Problem; Bozer, Yavuz A., Ellen C. Schorn and Gunter P. Sharp; September; p. 238.
Reacting to Scheduling Exceptions in FMS Environments; Dutta, Amitava; December; p. 300.
